WASHINGTON — President Trump now denies denying climate change. In an interview on Sunday with CBS’s “60 Minutes,” Mr. Trump backed off his long-held claim that global warming is a hoax. But he also made several new assertions unsupported by science.

Here’s a rundown of the president’s first extensive comments on climate change since Hurricane Michael ripped through the Florida Panhandle and the United Nations warned that time is running out to stave off the worst consequences of rising temperatures.

WHAT MR. TRUMP SAID

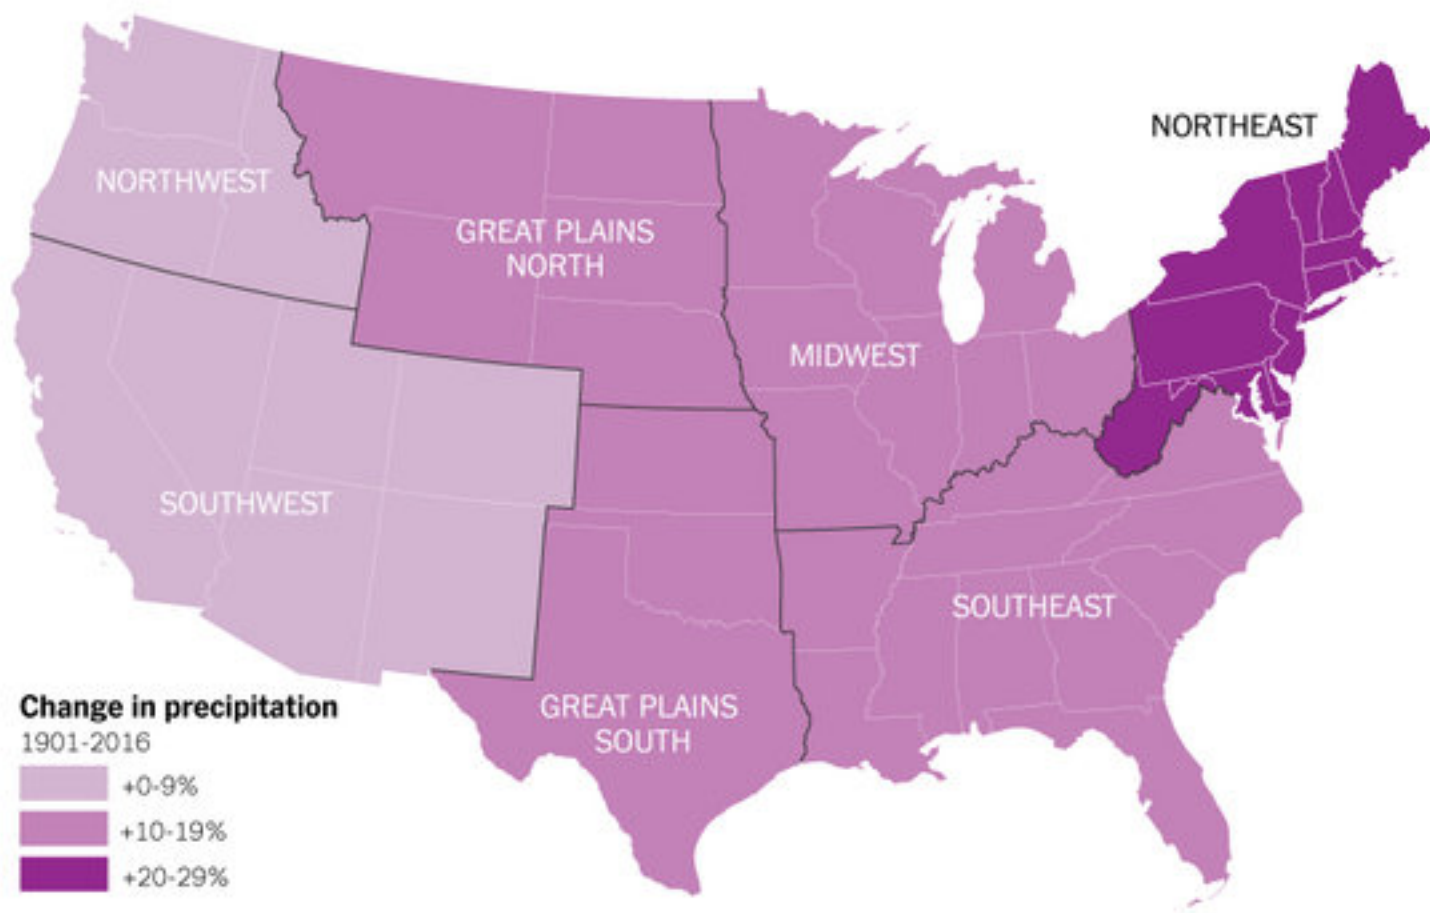

“I think something’s happening. Something’s changing and it will change back again.”

2017 Was One of the Hottest Years on Record. And That Was Without El Niño.

Researchers reported Thursday that 2017 average global temperatures are just below the record set in 2016. The result was surprising because there was no El Niño, the weather pattern usually linked to record-setting heat.
